

Flail Mower

Our versatile flail mowers are designed to fit excavators ranging from 1.7 to 14 tonnes, making them a powerful and reliable addition to your equipment lineup.

This innovative hammer-type flail mower excels in scrub clearing and verge mowing, effortlessly handling up to 90mm of green gorse and up to 40mm of dry woody material with ease.

Features:

- Includes hoses and 1/2-inch couplers
- 90 degree mounting base (N/S and E/W positioning)
- Dual belt drive (HD800), Triple belt drive (HD1000 & HD1200)
- External relief valves
- Swing mount and hoses included

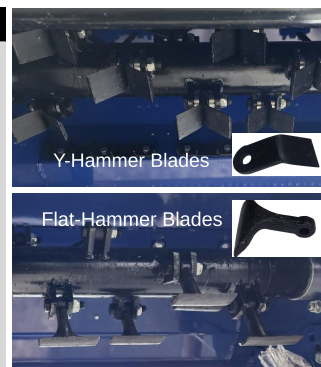

For added convenience, a hitch can be supplied to suit your specific excavator upon request. The 90-degree mounting base can be easily adjusted from side-ways to a length-ways configuration, allowing you to adapt to different job requirements effortlessly.

We offer the flexibility of both flat and fork-Y cast hammers. Replacement blades are available in stock for when replacement is required.

Every Hamilton Diggers flail mower is backed by a 2-year warranty, giving you confidence in your investment and the reliability you can count on for all your mowing needs.
