

Root Rake

'HD' Excavator Root Rakes - Engineered for Power. Built for Versatility.

Discover the strength and adaptability of our heavy-duty root rakes, designed to suit excavators from 1.5 to 20 tonnes.

Whether you're clearing land, removing roots, or sorting through demolition debris, Hamilton Diggers Root Rakes deliver the performance and strength you need to get the job done efficiently.

Custom Fit for Your Machine

Available in a range of sizes and designs to suit your specific excavator and application requirements.

Superior Clearing Capability

Effectively rips through roots, rocks, and compacted soil - ideal for land clearing, site preparation, and vegetation removal.

Demolition Ready

Highly efficient at sifting and sorting rubble, making it an excellent tool for post-demolition cleanup.

Built to Last

Manufactured from high-grade, abrasion-resistant steel, our root rakes are engineered for maximum durability and long service life.
